(5 Classes - 1 main method, each class has one obje

1. ```java
public class Test{
    public static void main (String[] args){
        Test obj = new Test();
    }
}
```

2. ```java
public class Test{
    public static void main (String[]args){
        Test obj = new Test();
    }
}
```

3. ```java
public class Test{
    public static void main (String[] args){
        Test obj = new Test();
    }
}
```

4. ```java
public class Test{
    public static void main (String[] args){
        Test obj = new Test();
    }
}
```

5. ```java
public class Test{
    public static void main (String[] args){
        Test obj = new Test();
    }
}
```
